**Work Based Learning** consists of structured learning experiences in the workplace or simulated environment experiences that are related to students’ career goals and/or interests, are integrated with instruction, and are performed in partnership with local businesses and organizations. WBL experiences enable students to apply classroom instruction, knowledge and skills in a real-world business or service-oriented work environment.

WBL experiences include the following components:
- Sustained interaction with industry and business
- Earning of credit/outcome verification (include student learning outcomes and measurable objectives)
- Aligned with curriculum and instruction
- Can be at the workplace or simulated in the classroom, lab, or other site

Work Based Learning experiences can fall into 6 categories:
- Internships
- Clinical
- Service Learning
- Technology-Based Learning including workplace simulations
- School-Based Enterprise
- Pre-Apprenticeship
- Practicum

Please review the draft rubric on the next page for use scoring students’ work based learning experiences.

**Prolonged or extended period not stand alone or one day**

Perkins V refers to “sustained” as a prolonged or extended period—not stand-alone or one-day. WBL experiences can happen during a school term, summer term, or a short-term intensive opportunity. Sustained interactions also require direct and ongoing interactions with industry, business, or community professionals in real or simulated workplace settings; foster in-depth, firsthand engagement with tasks in a given career field; and align with CTE POS curriculum and instruction and involve measurable student learning outcomes that are academic, technical, and professional.
